

Video tutorial at www.FreedomVMS.com/backup

This guide outlines how to backup footage not using bookmarks. The media used for the backup can be USB or DVD+-R/CD-R. After step 5, if backing up to USB skip step '6' and follow steps 6A & 7.

Typical capacity options: **USB=8GB-10TB**, **DVD=~3.8GB**, **CD=~630MB**,

If backing-up HD (High Definition) USB media is recommended due to its faster data throughput capability.

1: Click Backup icon

2: Click Download

3: Click Download and Export

4: Specify Date/Time range

5: Tick to select cameras

6: Click Download and Export

6A: If backing up to USB, change 'Save Path' to point to USB

7: For USB and local backup

If you choose the 'Download & Export' button, which must be used if you either need to backup to CD/DVD media or want to add additional files to your export. After the download phase has completed you will be prompted to insert your backup media and begin the DVD/CD export phase. If you don't need to add additional files insert your DVD/CD and click 'Yes' to proceed, to export to CD/DVD.

Once the exporting process has completed, you will get a notification, after which you can exit the Burn/Export window and 'Download' window. **Note:** an Export Player app is automatically included on the backup media along with PDF help guide on how to use the Player.

7: Choose 'No' if you want to add additional video or snapshot files to your backup.

Modifying your export selection

1: CTRL click to select more than 1 file at a time

2: Tick to view snapshot images, which you can include in your export

3: If backing up to USB click here & browse to USB drive location. If backing up to DVD/CD SKIP to step 4

4: If total export size exceeds your media capacity, you need to remove files from the 'Export list' using the remove button <<

5: Export

To add additional video files click (or CTRL-CLICK) to highlight each file from the left 'source files' list then click the add icon >> .

If the 'Export list Total' size exceeds your selected media capacity, you need to remove files from the right 'Export list'.

You do this by clicking each file you wish to remove and click the remove << icon. Once you are satisfied with your selection click the 'Export' button to proceed with your export.
