Reviewing Footage files that you have 'downloaded'

FREEDOM SURVEILLANCE **MULTI - PLATFORM**

▶ **Video** www.freedomvms.com/playback

The 'Local Player' is used to playback video files that you have downloaded, to open the Local Player', click the 'Playback icon (1) then click the '**Search**' button (2) then select '**Play local video'** see Fig 1.0
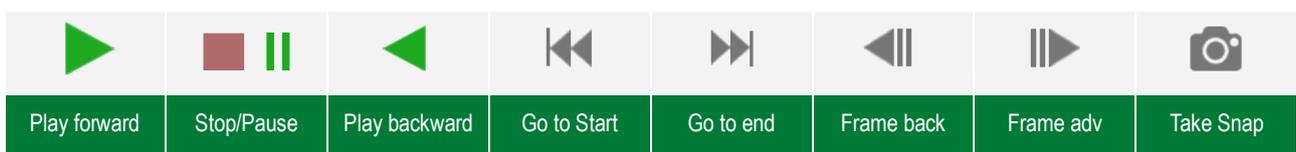

Fig 1.0
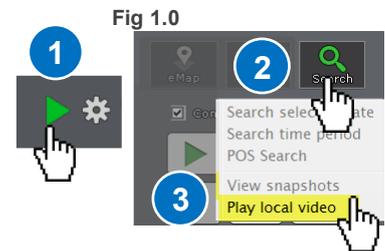

When opening the Local Player application from within the **Freedom software** it will open in the folder configured as your default 'Save Capture Path' location. If opening the Player from an external storage device like a USB device or DVD you need to select the correct source drive and folder in which the video files are located.

Fig 2

- Currently selected Drive
- Currently selected source folder. 'Double Click' to select another folder
- Right to convert to AVI format
- AVI Convert
- Full Screen
- Original Size(digital zoom)
